

Management & Board of Directors

James Woodyatt, Chairman and Chief Executive Officer

James worked in the financial markets industry from 1990 to 2005, holding various positions in institutions including Nomura Bank (Japanese equities, convertible and warrant bond sales), Tradition SA (interest rate swaps, inter-bank dealing) and Decillion AG (convertible arbitrage fund marketing). In 2001, James joined the hedge fund arm of Spain's Grupo Santander where he was a Senior Vice President, head of International sales and marketing and a member of the company's management committee. In 2007 James became a board member of xG Technology Inc. (then a London AIM listed company and since 2013 NASDAQ listed) and served on the board of xG until 2013. James acted as Deputy CEO from 2007 and as President (2012) of xG Technology Inc. until September 2016. James is fluent in French, English and Spanish and is conversant in German

Aaron McKay, President and Chief Technology Officer

Aaron is an information technology industry veteran with over 20 years of experience. Initially trained as a network engineer in the mid-1990's, Aaron has designed, built and successfully managed numerous global data networks. He has been the network architect for financial firms with billions of dollars in assets under management and global technology companies. He has provided inter-networking expertise to many private and government entities.

The various challenges of managing secure, wide-ranging data networks has provided Aaron the opportunity to stay current with constantly changing modern wired and wireless digital communications. Aaron has become a true believer in the Internet of Things (IOT), Artificial Intelligence (AI) Neural Networks and the innovative capabilities these technologies can deliver. Aaron has been on many deployments with the United States government both in the domestically and with the State Department in Mexico. Aaron is fluent in English and Spanish.

Gregg Rodes, Chief Financial Officer

Gregg has over 22 years of corporate finance experience working for publicly traded companies, and most recently served as Vice President of Finance at xG Technology, Inc. He has an extensive background working for start-up companies in medical, broadcast and cellular industries, focusing on SEC filings, manufacturing and operations. Gregg received his BS in Business Administration from the University of Florida and his MBA from Florida Atlantic University. As part of the first graduating class from Marjory Stoneman Douglas High School, making his investment in ITC both personal and professional.

Igor Velikov, Member of the Board of Directors

Igor Velikov serves as Executive Director of an international family office managing and developing investments in real estate, media and technology. He has been instrumental in expanding the offices' real estate portfolio throughout the United States as well as managing existing assets in Europe.

Igor began his career in private equity and real estate over two decades ago and enjoys finding undervalued markets and opportunities initially overlooked by other investors. Through his extensive contacts with business leaders, entrepreneurs, prominent lawyers, and government officials, he has established a strong network of partners including leading international telecom companies, natural energy and gas producers, large manufacturers, global engineering and construction firms, real estate developers and private equity investors. Igor is an avid classic car collector with a strong passion for vintage Italian race cars. Having lived on four continents, he is pleased to call Manhattan home.

Paul Kolodzy PhD, Member of the Board of Directors

Dr. Paul Kolodzy is an independent telecommunications consultant to government and commercial clients. His areas of expertise include the development of advanced component, device, and system technology; advanced architectures; interference analysis; and spectrum policy, regulation and acquisition. Paul has contributed in counter-UAS, underwater acoustic signal processing, laser measurement systems, and advanced signal analysis technologies. Dr. Kolodzy has served on multiple National Research Council studies on spectrum management and a Counter-UAS Study. He is a member of the Commerce Spectrum Management Advisory Committee (CSMAC). His career has spanned both public and private sectors (MIT/LL, Sanders, Stevens Institute, DARPA, FCC).
